Technical Skills:

- **Languages:** Java, Python, C++, C
- **Web Technology Languages:** HTML, CSS,
- **IT Constructs:** DS and Algorithms, OOPS, OS and DBMS
- **DB language:** SQL
- **Development tools:** Microsoft Visual Studio

Projects:

- **VEHICLE SHOWROOM MANGEMENT SYSTEM**
IMPLEMENTED USING VISAUL BASIC
Features -Admin user intercept, login, sales, service
- **Test Series Management System**, objective is to design , develop and maintain a project that will automate the existing manual system of the test series franchise. The system is capable of storing and maintaining the data of new admissions, monthly test paper submission and maintaining a database of the students. Here, for the security purpose system has powerful access management in place where each user must be identified by login id and password. The main objective of the system is to speed up the process, improve the efficiency and data consistency , by eliminating the paper work for maintenance of the records.
