INTERNSHIPS

- **Project Intern, DPU Incubation Center, Pune (March 2019-June 2019):** Worked on different modules of company projects and worked in the development of incubation center, document preparation and planning and also done technical documentation and modification.
- **Laravel Developer Intern, Emergeflew Technologies, Pune (September 2021 – March 2022):** Worked on various web development projects. I have worked with HTML, CSS, JavaScript, Bootstrap, Laravel and SQL. I have designed API's for various applications and also integrated Google Analytics with the websites.

PROJECTS

- **Banking System** - objective is to provide various banking services to the customer/user. Here, I have taken care of security aspects as well. I have stored pin's MD5 hash, rather than the original value for security reasons. This system stores the complete transaction details done by the Bank or the customer/user with memo. The main objective of this system is to reduce ambiguity about the transaction (withdrawal, transfer, deposit) details.
- **Store Management System** – This System is basically for torch making factory. In this, various departments are there which performs particular tasks. These departments are Purchase, Goods Receiving, Counting, Quality Check, Rework, Stores, Job Work, Production, Outward, Sales. This included all the

operations of placing purchase order, raw materials overview, add production estimation, handover to counting department or quality check or production, submit material to rework, align items in caret, create job worker profile, develop production report, etc.

- **InstaCheck App** – I have developed API's for the application of InstaCheck which verifies the credibility of a barcode that is scanned and checks whether that product is verified and could be purchased or not. Also I have designed the entire admin panel for the same application where the admin can perform various CRM operations.
- **CredKnow (Admin and User)** - This system is to be developed to collect unbiased and weighted reviews about credibility of a company, both from their suppliers and clients. The system also enables other companies to access detailed information about certain companies and view their existing requirement.

CERTIFICATIONS/ACHIEVEMENTS

- Introduction to Artificial Intelligence - GreatLearning
- Android Application Development - GreatLearning
- Introduction to Data Analytics – Simplilearn
- Blockchain Basics - GreatLearning
- Introduction to Javascript - GreatLearning
- Measures of Central Tendency - GreatLearning
- Data Analytics for Lean Six Sigma – University of Amsterdam

EXTRA CURRICULAR ACTIVITIES
